## LAPTOPS AND INTERNET IN MADRID

If you are bringing any electrical appliances to Spain (e.g. laptop computers, travel irons, etc.) you should bear in mind the voltage and type of plug used here. Spain uses the 220V voltage level and a frequency of 50Hz. Check that your electrical appliances will work with this voltage. You may also need a plug adapter. Spain uses plugs with 2 round pins (see image).

Wi-Fi Internet access is common in many hotels, apartments and other places such as the cafeterias of the large department store, El Corte Ingles.
