

Joint WP6-WP7 meeting
6th - 7th November 2014, Vilnius

Diabetes:

a case study on strengthening health care for people with chronic diseases

2nd WP7 meeting

Marina Maggini
National Institute of Health, Italy

Jelka Zaletel
National Institute of Public Health, Slovenia

Specific objectives

- ✓ To improve coordination and cooperation of Member States
- ✓ To focus on aspects of primary prevention, identification of people at high risk, early diagnosis, secondary prevention, and comprehensive multifactorial care, with attention to equity, and how social determinants may affect people's access to care
- ✓ To explore the significance of health literacy and patient empowerment
- ✓ To support the development and implementation of Member States' National diabetes plans

9:15-12:00

WP7: Diabetes: a case study on strengthening health care for people with chronic diseases (15 minutes each)

Marina Maggini (ISS) - Introduction

Jelka Zaletel (NIJZ) - Importance of NDP plan

Jaana Lindström (THL) - Quality criteria and indicators for diabetes prevention programs

Ulrike Rothe (TUD) - Quality criteria/key components for high quality of care for people with diabetes

Monica Sørensen (HOD) - Quality criteria and indicators for interventions of health promotion

Silke Kuske (HHU) - Quality criteria for evaluating the educational program for patients and training strategies for professionals

Anne Marie Felton (ECD) - Role/contribution of ECD and FEND in WP7

Dimitri Varsamis - (NHS England) - Role/contribution of NHS in WP7

11.15-12:00

Discussion

13:00-13.15	Milivoj Piletič (NIJZ) - Patient's empowerment, let's discuss the concept
13:15-13.30	Valentina Strammiello (EPF) - Social and psychological barriers for th access to care and for empowerment and/or patient's information needs
13:30-13.45	Vanessa Moore (EIWH) - The gender perspective on diabetes type 2
13:45-14:15	Discussion
14:15 - 15-15	WP7: Presentations of results of the questionnaires Žydrune Visockiene (VULSK) - Lithuania
15:15-16:00	Other Countries (TBD) Jelka Zaletel (NIJZ) - Workshop: Lead the work package to innovative results by 2016

16:30-18:30	Joint session WP6 and WP7- WPs' activities update
	16:30 - 17:15
	Marina Maggini (ISS) - Questionnaire on practices for prevention and management of diabetes, results of the pilot
	Flavia Lombardo (ISS) - Web-based version of the questionnaire
	Jelka Zaletel (NIJZ) - Questionnaire NDP, preliminary results
	17:15 - 18:00 WP6
	18:00 - 18:30 Discussion

Objective

The principal objective is to improve coordination and cooperation among Member States to act on diabetes, including the exchange of good practices across the EU.

A practice is the customary, habitual or expected way, method or modality of performing an action (policies, programs, interventions, ...)

A good practice is one that is worth disseminating because it is based on best available evidences, is associated with good outcomes.

set of criteria previously defined
or agreed in a consensus process

Underlying assumption

The exchange of good practices will improve the quality of care including its outcomes in terms of health.

An example

Integrated care is what we all want

BMJ 2012; 344 doi: 10.1136/bmj.e3959 (Published 7 June 2012)

Cite this as: BMJ 2012;344:e3959

Fiona Godlee, editor, BMJ

Integrated care is one of those concepts that's hard to argue against.

Who among us would not want hospital staff to work closely with primary, community, and social care services?

If, by integrated care, we mean seamless, high quality care, it's obviously desirable.

So why is it so hard to achieve? And why do we struggle to deliver it?

Sceptical, suspicious, unwilling, and obstructive clinical colleagues seem to have been the main opposition.

Driving the change

Connect the present to the long-term future

The Joint Action on Chronic Diseases and promoting healthy ageing across the life cycle (JA-CHRODIS)*
