Food Safety, European Commission

19 February 2015

The European Innovation Partnership on Active & Healthy Ageing

(EIP on AHA)

- Launched 2012 as part of Europe 2020, aims to add 2 Healthy Life Years by 2020 through *QoL*, *sustainability* and *growth/jobs*.
- Stakeholder-led, cross sectoral, collaboration instrument.
- Showcases good practices, builds critical mass, aligns funding. *Two streams*

EIP on AHA Action Groups work on

Prescriptions & treatment adherence

Preventing falls

Functional decline and frailty

Integrated care

ICT for independent living

Age-friendly environments

The EIP on AHA creates communities of practice and capacity for learning

EIP on AHA Action Groups, formed of **stakeholders working on commitments** (projects), engage in **collaborative work** which both

- creates **pan-European cooperation** structures and experience
- creates **useful knowledge products and tools** for better ageing.

Some examples of Action Group collaborative work

- ◇ screening & stratification tools
- ◇ regional maturity models
- ◇ new funding models
- ◇ telemonitoring programmes
- ◇ scientific articles
- ◇ information campaigns
- ◇ guidelines (e.g. for frailty)
- ◇ health literacy tools
- ◇ academic courses/training
- ◇ functional foods
- ◇ specific integrated care pathways

Outputs of the EIP on AHA Action Group on Integrated Care

- **Maturity Model** and results from 12 regions self-assessment
- Concrete **demonstrations of integrated care** models / services in these regions
- Demonstrations of practices covering range of themes / topics
- Tools and resources from **Toolkit** – covering organisational models, change management, workforce development, risk stratification, care pathways, citizen empowerment, ICT / Teleservices and Finance / funding models

Main Successes of the Action Group on Integrated Care

- **Growing integrated care stakeholder network** as a result of dissemination at European and regional forums.
- **Scaling up** integrated care pathways – e.g. AIRWAYS ICP – through successful engagement with regional health ministries
- Evidence of **inter-regional collaboration** – e.g. Memorandums of Understanding between Scotland with Catalonia, Greece and Basque Country
- Development of **regional EIP networks** – e.g. Greece, Puglia, Languedoc Roussillon, etc
- 2015: Good Practice **“pioneer” regions will coach “follower” regions**

JRC Monitoring Tool (MAFEIP project)

Develop a model to link interventions to QoL, Sustainability and Jobs/Growth

2015: Development of tool (Excel-based) to estimate outcomes of the EIP on AHA on health as well as the sustainability of health and care systems

Tool aimed to be useful individually or on aggregated level.

Distribution of the pilot first to EIP on AHA partners to see how it can be used.

Innovative Practice Collections

Available information

- Booklets of Good Practices –published in 2013
- Database Practices, **AG Adherence, Frailty & Age-friendly environments**
- Database Good Practices Reference Sites containing information Self-Assessment, Reference Sites Guide and How Guide

Database of Assessment tools

Objective: provide an overview of available:

Assessment tools of citizens' well-being in countries, regions or cities, and performance of health systems.

Decision tools to decide on new policies regarding well-being of citizens, and the introduction of new health technologies including:

- telemedicine solutions
(e.g. diagnostic & treatment methods)
- medical equipment
- pharmaceuticals
- rehabilitation & prevention methods
- organisational & support systems for healthcare delivery.

Implementation tools to support implementation of new policies, health technologies or treatments.

EIP on AHA Repository

- PROEIPAHA project
 - **H2020 funded EIP on AHA support action**
 - **2 year duration**
- Will deliver a **repository** building up on previous work of various projects
- Setting up of **working groups** around
 - **Functionalities**
 - **Definition of Assessment Criteria & Validation process**
 - **Testing the prototype**

Thank you
