

3rd WP7 meeting
Istituto Superiore di Sanità, Roma
July 2-3, 2015

Quality criteria Consensus process

Marina Maggini
National Institute of Health, Italy

The concept of CHRODIS

The main objective of JA-CHRODIS is to promote and facilitate a process of exchange and transfer of good practices between European countries and regions, addressing chronic conditions, with a specific focus on health promotion and prevention of chronic conditions, multi-morbidity and diabetes.

A Platform for Knowledge Exchange (PKE) will offer the most relevant information on the good practices. WP4 is dealing with the implementation of the PKE, closely coordinated with WP5, 6 and 7 to establish specific criteria to select good practices.

Definition of criteria – the process

Definition of a set of criteria to describe the practices reported in first questionnaire

Preliminary list

Final list of criteria

Forms to describe the practices

PREVENTION OF DIABETES: FOCUS ON PEOPLE AT HIGH RISK

Name of the program/experience

.....

available at: (website, reference,)

.....

the leading organization of the program/experience is:

.....

contact person: (name, e-mail)

.....

Please describe the main characteristics of the program according to the following criteria:

STRATEGY	Yes	No	NA*
Activities of diabetes prevention take into account			
ethnic minorities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
low socio-economic groups	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
gender differences	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The following data/statistics are available for the target population:			
prevalence of diabetes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
percentage of the population physically inactive	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
prevalence of overweight, obesity and abdominal obesity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
percentage of population following national recommendations on nutrition	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
SCREENING FOR HIGH RISK	Yes	No	NA*

Forms to describe the practices

In your opinion, why should this Training program be considered a good practice? *(max 250 words)*

.....

.....

.....

.....

Which are the reasons for success (positive lessons learned) and failure (negative lessons learned) if any? *(max 250 words)*

.....

.....

.....

.....

How does this Training program help in driving the change toward prevention and improvement the quality of care for people with diabetes? *(max 250 words)*

.....

.....

Consensus process

The Delphi method

CHRODIS Delphi consultations – WP4

The CHRODIS Delphi consultation gathers an expert panel to decide on the suitability and priority of a series of criteria to assess whether an intervention, policy, strategy, program, as well as practices can be regarded as a “good practice”.

RAND modified Delphi methodology

RAND Delphi method

- RAND developed the Delphi method in the 1950s.
- The method entails a group of experts who anonymously reply to questionnaires and subsequently receive feedback in the form of a statistical representation of the "group response," after which the process repeats itself. The goal is to reduce the range of responses and arrive at something closer to expert consensus.
- The Delphi method has been widely adopted and is still in use today.

<http://www.rand.org/topics/delphi-method.html>

CHRODIS Delphi method – WP4

The consultation entails

- two online rounds using a web-based questionnaire
- a face to face meeting

The first web-based questionnaire includes the criteria identified through a search and appraisal of primary and secondary documents

The number of participants is 15-30

CHRODIS Delphi

Delphi I (WP4-WP5) on health promotion and prevention *(completed)*

Delphi II (WP4-WP6) on organizational interventions, with particular emphasis in interventions on multimorbid patients *(in progress)*

Delphi III on patient empowerment *(identification of experts undergoing facilitated by EPF)*

Delphi IV (WP4-WP7) on diabetes

WP4-WP7 Delphi on diabetes

- Based on the criteria already identified by WP7 (prevention focused high risk people, health promotion, management, education, training)
- The criteria will be reviewed and weighted by a panel of experts (WP7 partners to be included)

- Autumn 2015 definition of the expert panel
- Jan. 2016 setting the questionnaire
- Feb-March 2016, round questionnaires

The Joint Action on Chronic Diseases and Promoting Healthy Ageing across the Life Cycle (JA-CHRODIS)*

Co-funded by
the Health Programme
of the European Union

* This presentation arises from the Joint Action addressing chronic diseases and healthy ageing across the life cycle (JA-CHRODIS), which has received funding from the European Union, under the framework of the Health Programme (2008-2013).
