3rd WP7 meeting Istituto Superiore di Sanità, Roma July, 2-3, 2015

Patient Empowerment: a lever for change

Putting truly the patient at the centre of health policy

Valentina Strammiello European Patients' Forum

Mission and Vision of EPF

European Patients' Forum:

- umbrella organisation
- active since 2003
- 65 member organisations

Our Mission!

"To ensure that the patient community drives health policies and programmes that are adapted for their final users, patients."

A Definition of Patient Empowerment

A multi-dimensional process that helps people gain control over their own lives and increases the capacity of people to act on issues that they themselves define as important.

99

Luttrell et al. (2009), Understanding and operationalising empowerment. Overseas Development Institute working paper.

Three levels:

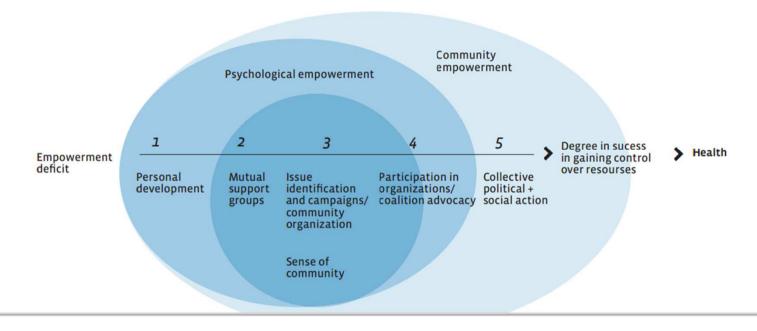

- Micro (individual patient)
- Meso (organisational level)
- Macro (policy level)

Personal empowerment

Community empowerment

Individual and Community Empowerment

Model of the critical components of community empowerment and the process by which it may be achieved (Rissel, 1994, s 43)

(Dis)empowerment is a major issue

Burden of chronic disease

Impacts of illness: physical, psychological, emotional, social, financial ...

Health system difficult to navigate:
patients often feel disempowered in
their interactions with "the system"
– having to fight to get what they
need

(Dis)empowerment: contributing factors

Micro level:

Lack of communication between patient and healthcare professional

Meso level:

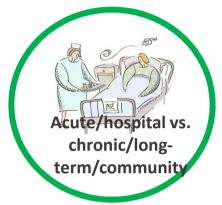

Care delivery processes and design of the environment

Macro level:

- (Lack of) Information to patient
- Implementation of patients rights laws
- Opportunity for patients to participate in health policy
- (Lack of) Transparency of the system

EU Policy challenge: Health systems

European
health
systems:
Sustainability
challenge

Do not meet patients' needs

CHRODIS

EU Policy Context

EU Reflection
Process on
Chronic disease
management

March 2010

Eurobarometer study on "Patient Involvement"

May 2012

Sept. 2014

Mapping Study (EMPATHIE)

Chronic disease
patients are more
knowledgeable and
motivated to be
involved in their care
– also more critical of
health system

WWW.CHRODIS.EU

EU Policy Context

Patientcentredness recognised as a key dimension of quality

Expert panel opinion on **EU's future quality of care agenda** (incl. EPF)

Case for further work at EU level to define and measure it

WWW.CHRODIS.EU

"Pockets" of empowerment in existing EU regulations and soft laws

Cross-border healthcare

Quality and Safety of medicines

Medical devices

Self-management: a networking approach

ENOPE – European Network for Patient Empowerment

An informal network of likeminded organisations promoting patient empowerment through evidence-based programmes and innovative action Implementing evidence-based programmes on chronic disease self-management (based on <u>Stanford model</u>)

Organising international conferences and events

Advocacy and awareness-raising, training for CDSMP trainers

Good practice

Designing care around patient needs

Patient = Expert

Involve POs at provider AND policy level

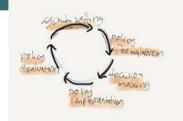

www

Patient Experience ≠ patient satisfaction surveys

EPF: Value + model
to facilitate patient
involvement

Involve patients throughout the policy cycle

Patient
involvement is
key to
developing
services so they
really meet the
needs of (all)
patients

Patient-centred innovation

Innovation that is important for patients

 Priority-setting for research Better alignment of innovation with real needs

Need to involve patient throughout the innovation chain

Co-design research/patient-centred clinical trials, pricing and reimbursement decisions...

- Better quality research results
- Strengthened trust and acceptance of research

WWW.CHRODIS.EU

Patient involvement in regulation

since 2005

Patients & Consumers' Working Party (PCWP) 34 POs

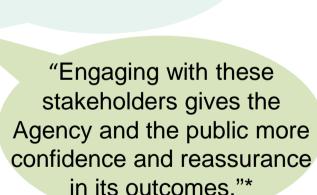

Full members of MB, COMP, PDCO, CAT and PRAC

Pilot phase: Observers at CHMP

Assessment of EPARs, PIL, safety information, scientific advice, protocol assistance...

- → Patients at all capacity levels
- → "Level the ground" support
 system

"patient groups ... have helped to provide valuable insights"

^{*} European medicines agency: Fifth report on the interaction with patients' and consumers' organisations (2011) published in 19 September 2012.

Patient Involvement in HTA

WHY?

Because patients are concerned with the impact new health technologies have on their lives

What do patients ask for?

- <u>Involvement, Transparency, Accountability</u> to trust
 HTA
- More informed decision: Patients can tell how the technology better fits into their daily lives
- Consideration of <u>quality of life and extra-clinical</u>
 <u>benefits</u>

WP7 Diabetes: a case study on strengthening health care for people with chronic diseases.

An example of policy action at European level

the EPF Campaign on Patient Empowerment

Campaign on Patient Empowerment

One-year patient-led campaign

- Why? To promote a common understanding and call for an EU strategy on Patient Empowerment
- Who? EU health Stakeholders & decision-makers
- When?
 - May 2015: major launch conference
 - November 2015: development of a Roadmap &
 Charter to advocate at the EP
 - June 2016: Exhibition at the European Parliament

Campaign on Patient Empowerment

Campaign messages

• EDUCATION

• **E**XPERTISE

• EQUALITY

• **E**NGAGEMENT

• **E**XPERIENCE

Campaign on Patient Empowerment

Want to get involved?

- Show your support to the campaign
- Spread the word!
- Share good practices
- Share your testimonial

PATIENTS WITH CHRONIC CONDITIONS ARE OFTEN
REFERRED TO AS THE MOST UNDER-USED RESOURCE IN
THE HEALTH SYSTEM WHILE PATIENT-CENTRED CARE
MODELS HAVE DEMONSTRATED BETTER QUALITY OF
CARE AS WELL AS POTENTIAL LONG-TERM
COST-EFFICIENCIES. TOO MANY PATIENTS ARE STILL
STRUGGLING TO GET THE SUPPORT THEY NEED TO
BECOME EQUAL PARTNERS IN CARE. TO MAKE REAL
PROGRESS, WE NEED TO MAKE PATIENT EMPOWERMEN
A PRIORITY, STARTING WITH THE DEVELOPMENT OF AN
EU-WIDE STRATEGY AND ACTION PLAN

EPF PRESIDENT, ANDERS OLAUSON
