

The Chrodis Platform

Vienna 2016, Nov 10th

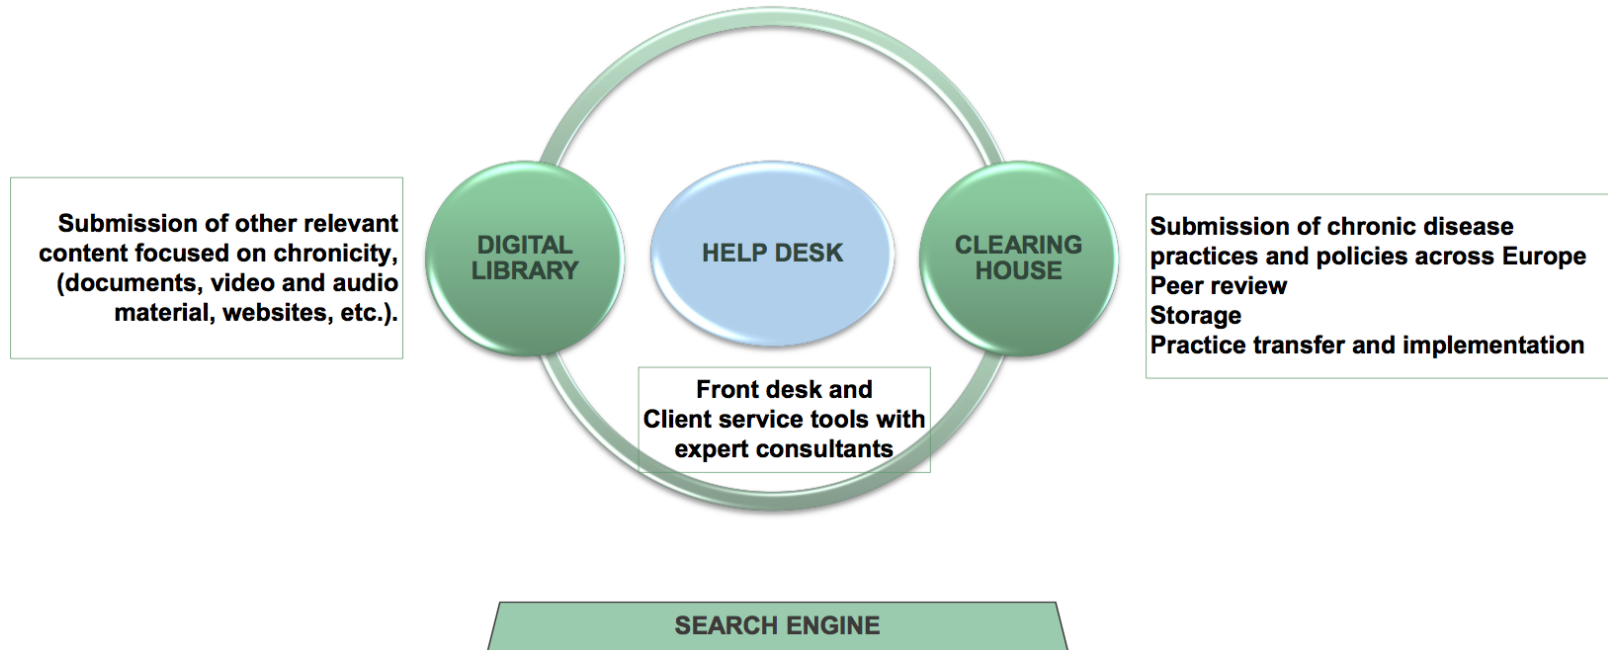

Dr. Enrique Bernal-Delgado on behalf of WP4 team
Institute for Health Sciences (IACS), Spain

Resources centre that combines a clearinghouse (evaluative area) and a **classic repository** (digital library), and is supported by a **help desk service** (not just meant to solve users problems but mainly help users to make decisions **on implementation and evaluation**).

Diabetes Counselling On Wheels – Early Detection And Counselling On The Subject Of Diabetes For Citizens Of Turkish Origin And The Rural Population

Area of interest: Health Promotion and Prevention

Chronic condition: Diabetes

Practice Description

Practice Assessment

For each criterion assessment, set the agreement / disagreement level with respect to the proposal carried out by the author of the practice by using the slider elements provided to that effect, according to the likert scale:

1 Fully disagree	2 Disagree	3 Uncertain	4 Agree	5 Fully agree
---------------------	---------------	----------------	------------	------------------

▼ DESCRIPTION OF THE PRACTICE

Mobile diabetes prevention and counselling services targeting older, rural populations with a special attention for Turkish migrants

1. Was the design of the intervention appropriate and built upon relevant data, theory, context, evidence, previous practices (including pilot studies)?

Yes

Level of agreement:

1	2	3	4	5
---	---	---	---	---

2. Did the design thoroughly describe the practice in terms of purpose, SMART objectives, methods (I.e. recruitment, location of intervention, concrete activities, and timeframe (sequence, frequency, and duration))?

Yes

Level of agreement:

1	2	3	4	5
---	---	---	---	---

Intervention On Diabetes Prevention And Screening In Vulnerable Populations Of The Metropolitan Lisbon Area

Area of interest: Health Promotion and Prevention

Chronic condition: Diabetes

Practice Description

Practice Assessment

For each criterion assessment, set the agreement / disagreement level with respect to the proposal carried out by the author of the practice by using the slider elements provided to that effect, according to the likert scale:

1 Fully disagree	2 Disagree	3 Uncertain	4 Agree	5 Fully agree
---------------------	---------------	----------------	------------	------------------

DESCRIPTION OF THE PRACTICE

The intervention was developed to address the needs of vulnerable urban populations, with concomitant reduced access to healthcare, in regards to diabetes prevention and screening/diagnosis. This was implemented in collaboration with municipalities and local social partners of the Metropolitan Lisbon Area, between 2008 and 2014. Implemented activities included training sessions about diabetes prevention and management for both healthcare and social care professionals, sessions about diabetes prevention and healthy lifestyles promotion for the adult population, and diabetes risk screening sessions also for the general population.

1. Was the design of the intervention appropriate and built upon relevant data, theory, context, evidence, previous practices (including pilot studies)?

Yes

Reviewer #1's level of agreement

1	2	3	4	5
---	---	---	---	---

Reviewer #2's level of agreement:

1	2	3	4	5
---	---	---	---	---

Level of agreement:

1	2	3	4	5
---	---	---	---	---

2. Did the design thoroughly describe the practice in terms of purpose, SMART objectives, methods (i.e. recruitment, location of intervention, concrete activities, and timeframe (sequence, frequency, and duration))?

Yes

Reviewer #1's level of agreement:

1	2	3	4	5
---	---	---	---	---

Reviewer #2's level of agreement:

1	2	3	4	5
---	---	---	---	---

Level of agreement:

1	2	3	4	5
---	---	---	---	---

TARGET POPULATION

Adult population located at low socioeconomic neighbourhoods in the Lisbon Metropolitan Area. Also, healthcare and social care professionals that cover the mentioned neighbourhoods.

1. Was the target population/s defined on the basis of needs assessment including strengths and other characteristics?

Yes

Reviewer #1's level of agreement:

1	2	3	4	5
---	---	---	---	---

Reviewer #2's level of agreement:

1	2	3	4	5
---	---	---	---	---

Level of agreement:

1	2	3	4	5
---	---	---	---	---
