The “how”

..what is a National Diabetes Plan?

- any formal strategy for improving diabetes policy, services and outcomes that encompass structured and integrated or linked activities which are planned and co-ordinated nationally and conducted at the national, state or district, and local level; and
- systematic and co-ordinated approach to improving the organisation, accessibility, and quality of diabetes prevention and care which is usually manifested as a comprehensive policy, advocacy and action plan.

Factors that appear to facilitate the development, implementation and sustainability of NDPs

Policy Brief on National Diabetes Plans in Europe:
What lessons are there for the prevention and control
of chronic diseases in Europe?

www.chrodis.eu

Leadership

- National/regional
- Multiple stakeholders
- Balance between centrally defined requirements and regional autonomy
- Assuring adequate resources and capacity for implementation, monitoring and evaluation

Strong advocacy

By patient representation

- In development
- In implementation

Flexibility

- Learning from its own experience (monitoring, evaluation)
- Learning from others
