Exhibit 2: Emerging Economies Must Avoid the Traditional Development Path of Health Systems

Source: WHO, Word Bank, BCG analysis
The returns on investing in health are impressive. Reductions in mortality account for about 11% of recent economic growth in low-income and middle-income countries as measured in their national income accounts.
Identifying Factors Associated with High-Cost Patients

Morbidity could be postponed

Review Article

James F. Fries, Bonnie Bruce, and Eliza Chakravarty

Department of Medicine, Stanford University School of Medicine, 1000 Welch Road, Suite 203, Stanford, CA 94304, USA

Figure 5: Disability progression—ages 58–79 years: Runners’ Club and Community Controls. Progression of disability in Runner’s Club and Community Control groups over 21 years from an average age of 58 is compared in the figure both with yearly disability values and statistically derived regression lines. The regression lines are derived from linear mixed models and adjusted for age, gender, BMI, smoking, and initial disability. Comparison of postponement
Chrodis Plus

- 5 million euro
- 45 Associated partners
- 21 countries

Advancing from the results and products of Chrodis
Background

- Implementation of best practices for prevention and management of chronic diseases
- Scaling up and transferability and long term sustainability
- Addressing broad determinants of health and risk at populations
- Multi-sectorial and multi-professional (smoking, alcohol abuse, unhealthy diet, physical inactivity and others)
- Employment and working conditions and chronic diseases
- Reaching out there
- Coordination with what is out there
Coordination

- Ensuring that all JA activities pursue and contribute to the overarching goals and aims of JA
- Coordination with CHAFEA and the Commission
- Relevant stakeholders
- Advisory Board
Dissemination

- Effective external and internal communication
- Stakeholder analysis
- Platform: transfer to EC
- Web, newsletters, social media…
Evaluation

- Verify achievement of objectives
- Correct limitations detected and boost strengths
- Assess the impact of JA
Integration in Health Care Policies and Sustainability

- Policy dimensions for implementation (local, regional, national) of knowledge produced elsewhere
- Identifying the determinants of local uptake of best practices
- Governing Board
Chrodis Plus

- Health promotion and prevention
- Implementation of Multimorbidity Care Model
- Quality in prevention and care of single chronic disease

Support people affected by or living with NCDs

Integration in Health Care Policies and Sustainability
Health promotion and prevention

- Health promotion and prevention of chronic diseases by facilitating the exchange of knowledge and experience about effective strategies as well as the actual implementation of good practice
Quality in prevention and care of chronic diseases

- Fostering quality in prevention and care in chronic diseases: from diabetes to chronic diseases through pilot actions:
  - Will build on the results and the lessons learnt in diabetes field to implement good practices and to foster implementation of high quality prevention and care for people with any chronic disease
Implementation of Integrated Care Model for multimorbidity

- Multimorbidity Care Model developed by JA-CHRODIS

- Implementation:
  - Assess
  - Test
  - Adapt
  - Multiply/Scale up
The Joint Action on Chronic Diseases and Promoting Healthy Ageing across the Life Cycle (JA-CHRODIS) *

* This presentation arises from the Joint Action addressing chronic diseases and healthy ageing across the life cycle (JA-CHRODIS), which has received funding from the European Union, under the framework of the Health Programme (2008-2013).
