CHRONIC DISEASES AND EMPLOYMENT

Background

1 out of 4 European
suffer from a **chronic health**
condition

Almost a **78%** of
people with **long-standing**
health problems are not in the
workmarket in EU-28

Employed Unemployed
Other inactive Retired

Work status of people with long-standing health problems
(EUROSTAT 2015)

Employed people with chronic
health conditions experience
difficulties at workplace

Any problem Mild problems Severe problems

Percentage of people with chronic health conditions experiencing
workplace problems (Varekamp, & Van Dick, 2010)

CHRONIC DISEASES AND EMPLOYMENT

Individuals with **chronic diseases and mental health conditions** often experience **work-related problems**, leading to negative consequences at individual, national and European level. The rising prevalence of persons with chronic diseases and mental health conditions as well as the **current economic crisis** make this issue even more problematic, requiring action in terms of innovative strategies to improve the participation of these persons in the labor market.

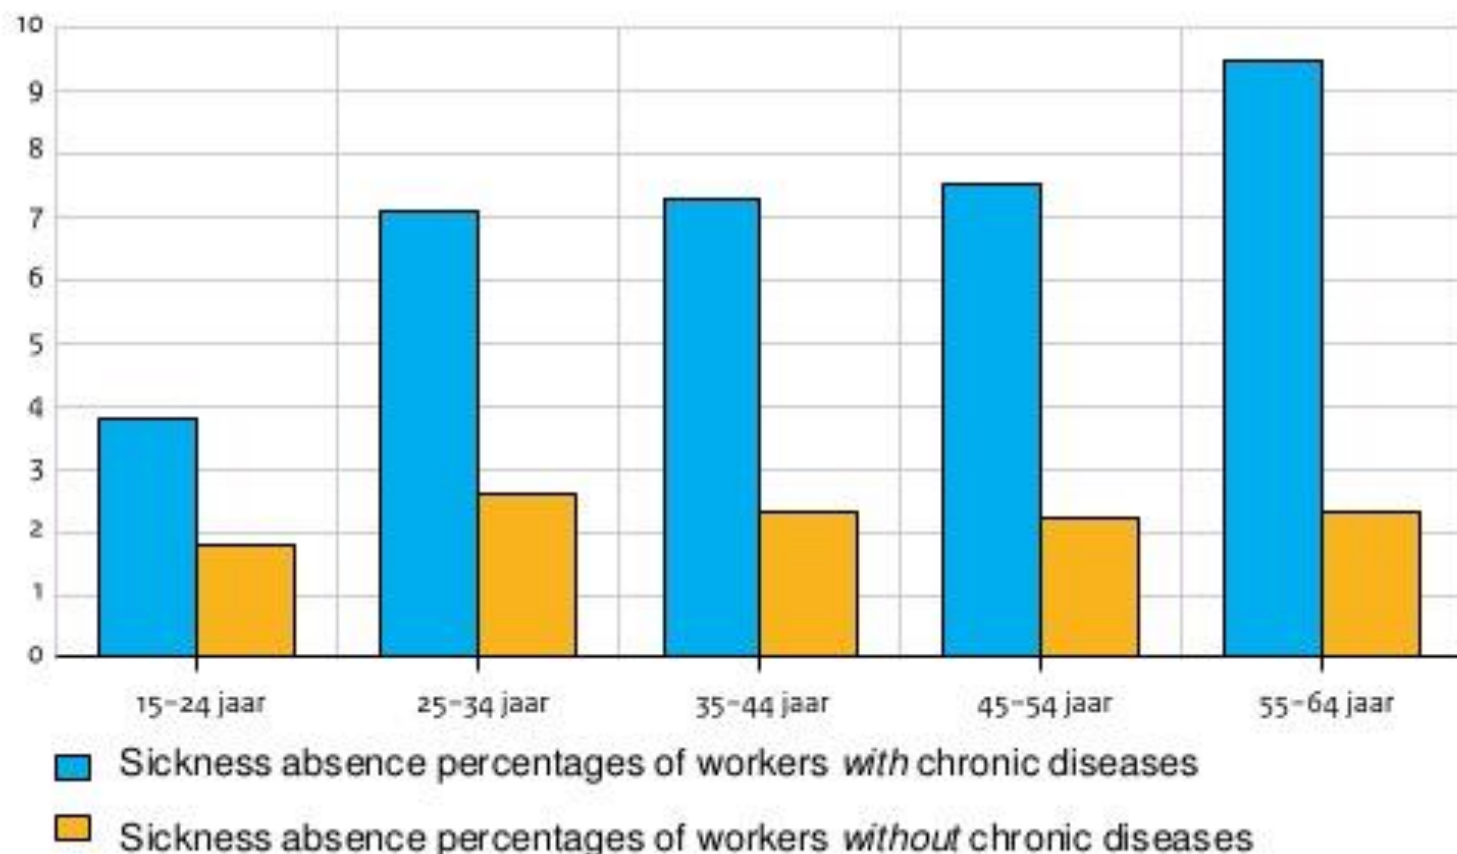

PERSONS WITH CHRONIC DISEASES HAVE LESS POSSIBILITY TO BE EMPLOYED

Sickness absence rates of workers with and without chronic diseases - age

CHRONIC DISEASES AND EMPLOYMENT

The increase in expenses for health care and its unsustainability are becoming a real problem because of a **labour market unable to manage the growing number of chronic patients/workers with chronic conditions**

CHRONIC DISEASES AND EMPLOYMENT A RISING ISSUE

Importance to consider the point of view of all the involved actors: employers, employees, unions, policy makers

PROBLEMS AND BARRIERS FOUND by EU PATHWAYS project on employment and NCDs

Problems reported by employers

- Perceived poor productivity levels
- Frequent absenteeism
- Extra-costs for the enterprise
 - The need to pay wages
 - Existing legal obligations to facilitate the return to work,
 - Limitations on firing
 - Need to adapt workplaces.

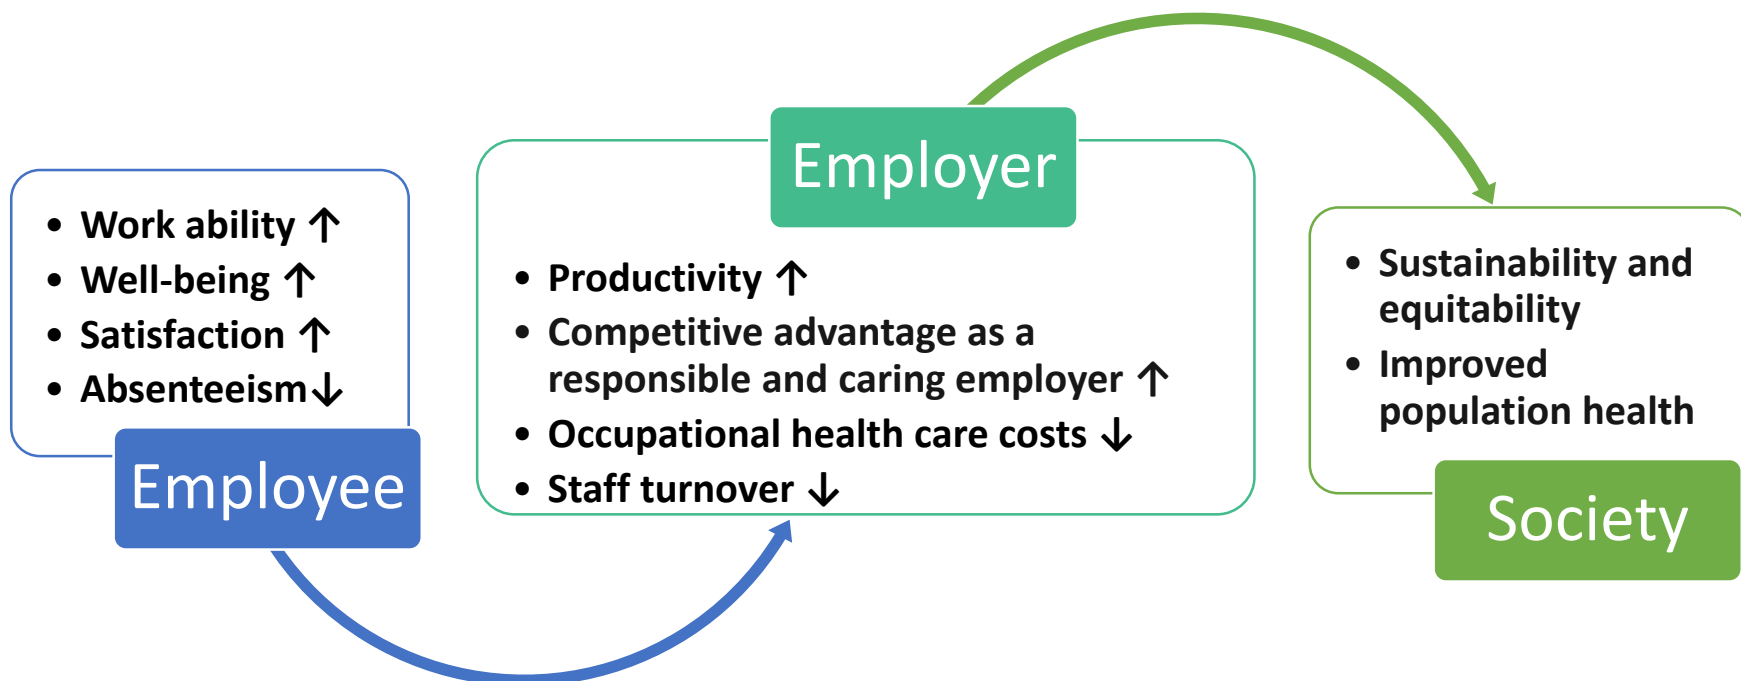

Problems reported by people with chronic health conditions

- **Fatigue**
- **Feelings of depression**
- **Feeling alone**
- **Lack of understanding from others**
- **STIGMA**

Problems reported by coworkers

Annoying for colleagues

Workplace health promotion benefits the employee, the employer, and the society (WHO 2008)

Health in all sectors: Employment in the Multimorbidity Care Model Tool for international use

1. **integrating health and welfare policies: chronic diseases in the work sector, employment in the care pathway**
2. identify elements that are fundamental to guarantee inclusion, maintenance, and reintegration of people with chronic diseases in the workplace and;
3. include these issues in the Chrodis Multimorbidity Care Model, using CASE MANAGERS

WP 8 Deliverables

The CHRODIS PLUS Training Tool for managers

To help employers understand the operational benefits of

- *inclusion AND*
- *re-integration into the workplace*

of people suffering from chronic diseases

The CHRODIS PLUS Toolkit to support employees' wellbeing, health, and work participation

An evidence-based, practice-oriented guide for employers to *adapt their work environments to support healthy lifestyles and prevent and manage chronic diseases in work settings*

The Toolkit provides employers with support for understanding *the importance of work environments + the benefits of health promotion and chronic disease prevention, in order to promote the implementation of prevention activities for all workers and identified high-risk groups*

Co-funded
by the Third Health Programme
of the European Union

Task 8.1

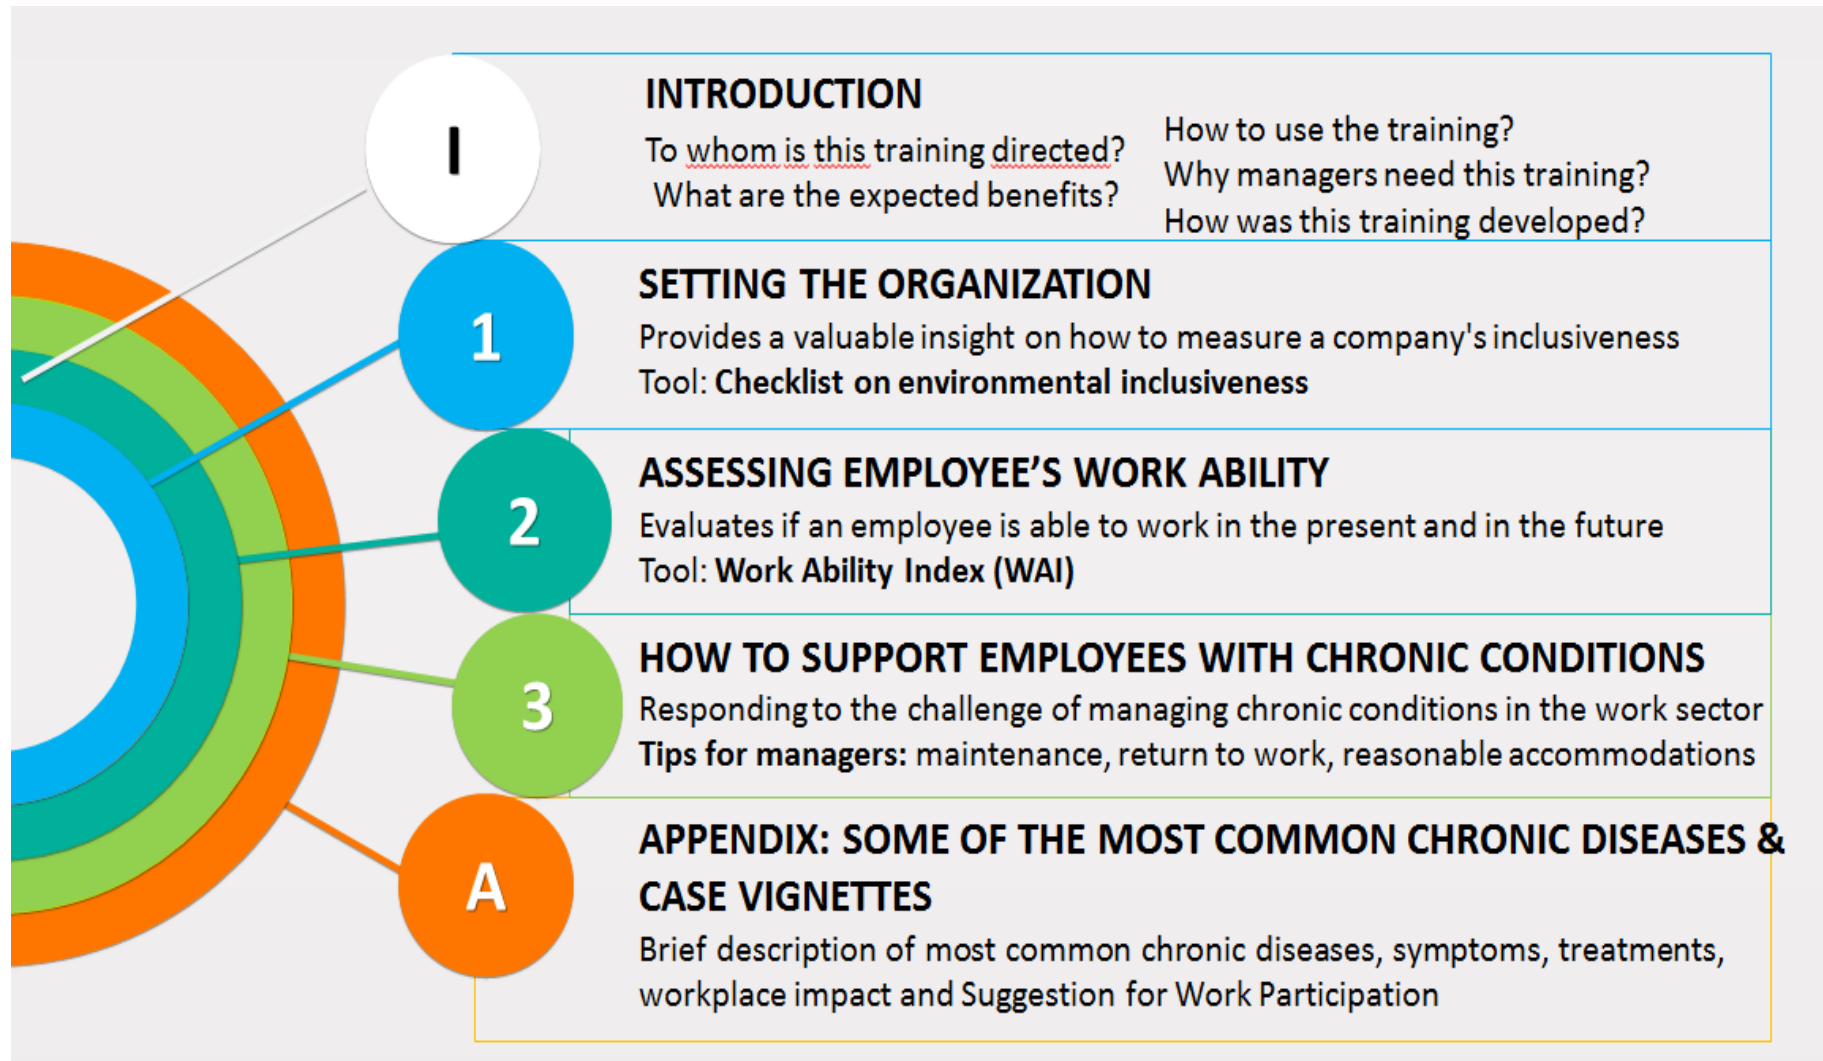

Training tool for managers

**Promoting inclusiveness
and workability for people
with chronic health
conditions**
**Chrodis Plus Training Tool
for managers**

Task 8.1

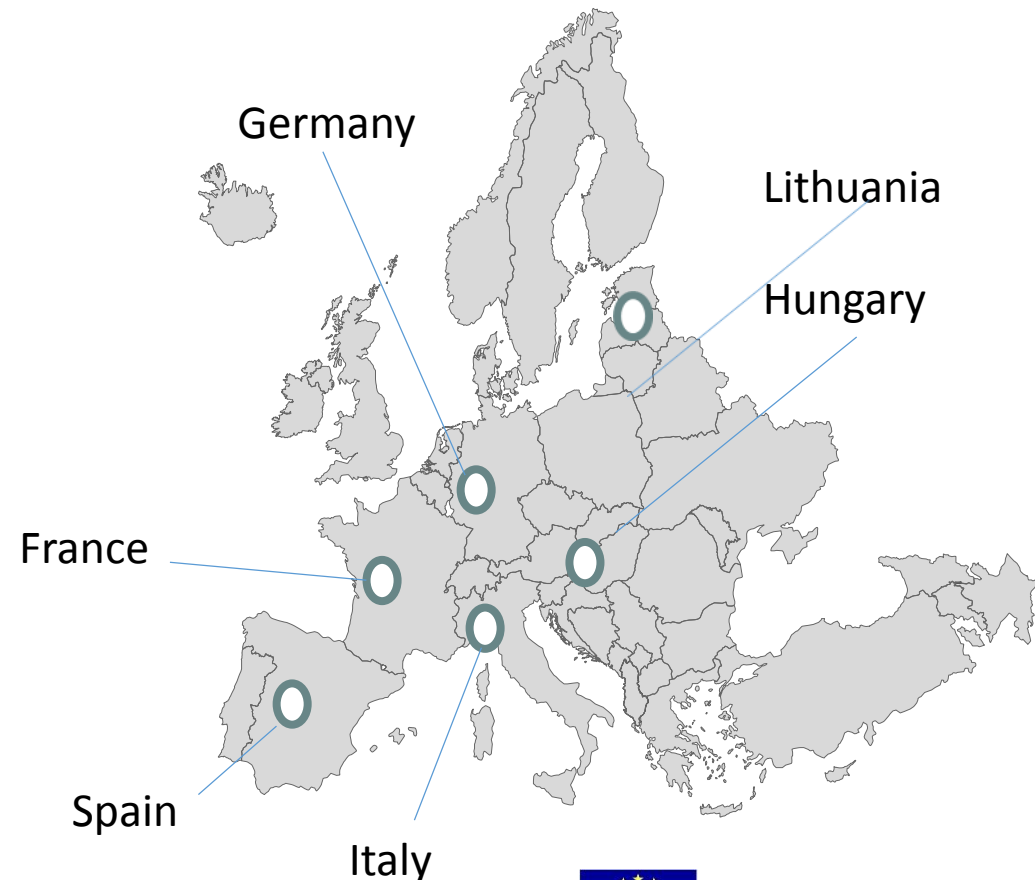

Training tool for managers – Contents

WP8 Task 8.1

Training tool for managers - Pilot Testing

Countries involved in the pilot testing of the training tool

- Italy (FINCB)

- France (INCa)

Toolkit to support employees' wellbeing, health, and work participation

Eeva Rantala & Jaana Lindström, National Institute for Health and Welfare, Finland

chrodis.eu

Abstract

Background

Working people spend 1/3 of their waking hours at work. Hence, workplaces offer an ideal setting for reaching and promoting the wellbeing of large audiences.

Fostering occupational wellbeing benefits both employees and employers:

- ✓ Greater employee satisfaction at work
- ✓ Higher productivity
- ✓ Reduced staff turnover

Aim

To develop a Toolkit for the management of workplaces that compiles practical means to:

- 1) promote employees' wellbeing and health
- 2) prevent the development of lifestyle-related chronic health problems
- 3) support employees with chronic health problems to continue working

Materials & methods

The Toolkit is:

- ✓ developed based on scientific and empirical evidence
- ✓ tested and evaluated by voluntary workplaces in several European countries.

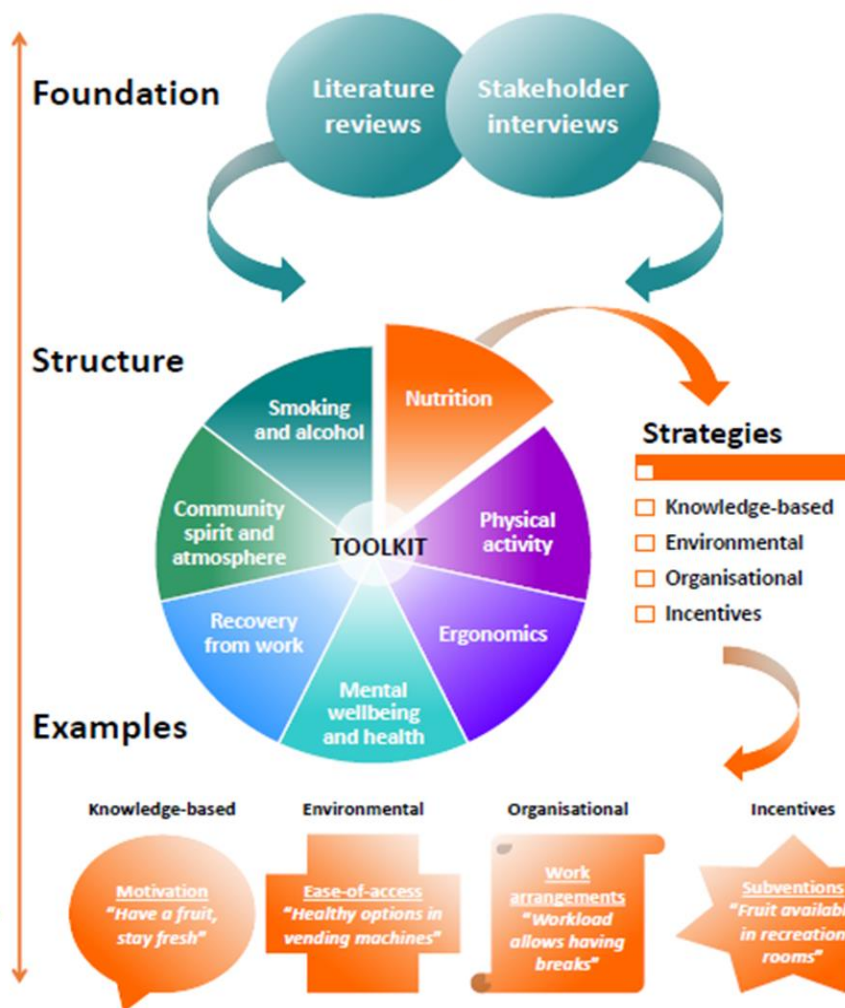

Key messages

- ✓ Sharing practical ways to enhance employees' wellbeing, and to facilitate individuals with chronic health problems to continue working aids workplaces to improve their competitive advantage and profitability.
- ✓ The Toolkit forms a part of the end product of Joint Action CHRODIS+ WPS, together with the Training tool for managers.

Foundation

Structure

Examples

Groundwork

Literature studies

Three systematic literature reviews were conducted to compile scientific evidence on the effectiveness of interventions targeting healthy lifestyle, prevention of non-communicable diseases, and enhancing the work participation of employees with chronic health problems in a workplace setting.

Stakeholder interviews

Forty-two stakeholder interviews were conducted in five European countries to gather empirical data on actions taken at workplaces to:

- ✓ support employees' wellbeing and health, and the work participation of employees with chronic health problems
- ✓ understand facilitators and barriers for taking such actions
- ✓ identify factors that encourage and discourage employees to make use of these actions

Interviewees represented managers and employees of workplaces from various industries, and professionals of occupational wellbeing.

Toolkit development

The Toolkit is constructed and structured based on the findings of the groundwork (see figure on the left).

Pilot & evaluation

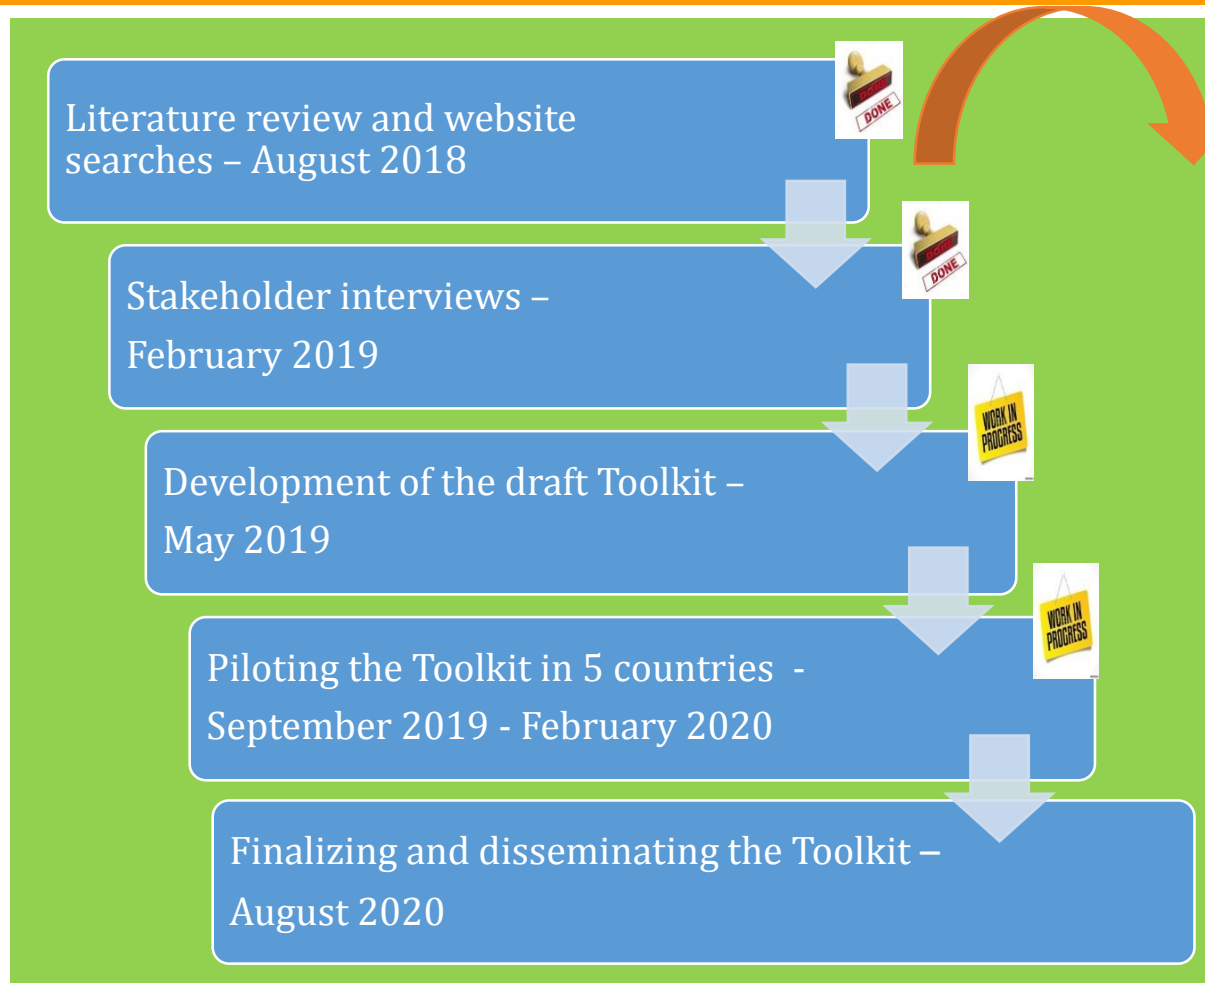

Toolkit feasibility is assessed using survey data collected from piloting workplaces. Key indicators are:

- ✓ Ease-of-use
- ✓ Coverage
- ✓ Utility

Acknowledgements

Mari Olkkonen and Reetta Eerikäinen for contributing to the groundwork of the Toolkit, and Joint Action CHRODIS+ for funding the work.

CHRODIS PLUS Task 8.2: Toolkit to support employees' wellbeing, health, and work participation – Coordination:THL

1. The effectiveness of workplace health promotion interventions to prevent chronic diseases – a systematic review of reviews: **RIVM**
2. Promotion of healthy lifestyle, prevention of chronic diseases, and enhancing work participation of employees with chronic diseases at workplace. Results of a scoping meta-review.: **THL**
3. Evaluation of the effectiveness of existing integration and reintegration into work strategies for persons with chronic conditions: **FINCB**

The Joint Action on Implementing good practices for chronic diseases (CHRODIS PLUS)

This presentation arises from the Joint Action CHRODIS PLUS. This Joint Action is addressing chronic diseases through cross-national initiatives identified in JA-CHRODIS to reduce the burden of chronic diseases while assuring health system sustainability and responsiveness, under the framework of the Third Health Programme (2014-2020). Sole responsibility lies with the author and the Consumers, Health, Agriculture and Food Executive Agency is not responsible for any use that may be made of in the information contained therein.
