

# Pilot implementation of CHRODIS Integrated Care Model in a tertiary referral hospital in Italy

Carfi A., Onder G., Di Paola A., Angioletti C. — Catholic University of Sacred Heart, Rome, IT

chrodis.eu

HOW.

**GOAL.** Improve communication and coordination of care among members of the health care team and patients.

**Poor care coordination**

Patients don't have a reference care provider

**Difficult accessibility**

In a big urban context patients are exposed to long trips to the hospital care

**GOAL.** Make services more readily available or convenient for people with limited mobility, time or transportation options.

HOW.

Technocare service

**SO FAR.** The case manager is successfully coordinating health care team members and patients

**SO FAR.** 115 Patients with AD and DS have been re-assessed with the CGA tool provided by the InterRAI network

HOW.

Comprehensive geriatric assessment tools

**GOAL.** Assess patients with a comprehensive-ly including all clinically relevant domains and possibly spotting undetected care needs.

**Adults with Down syndrome and Alzheimers' disease**

**COMPLEXITY**

**Is their common feature**

**Fragmentation**

Specialized care could trigger useless and even harmful cares and miss important health needs

**Disempowerment**

Patients and caregivers feel harmless in many medical and non-medical areas such as social life, mood, communication, self care.

**SO FAR.** Two sessions of focus group meetings with patients and their family members were completed

**HOW.** Group meetings and training courses for patients and family members.

**GOAL.**

Improve patient self-management
