

WP7

Diabetes:

**a case study on strengthening health care
for people with chronic diseases**

Marina Maggini
National Institute of Health, Italy

Jelka Zaletel
National Institute of Public Health, Slovenia

Methods

A collaborative working method was adopted based on:

- consensual decisions made by the task leaders, WP leader and co-leader
- task coherent work plans
- use of the WP7 platform as a tool for supporting all the activities
- creation of a community of practice

WP7 Web-based Platform

The ISS team has developed a web environment to support the WP activities

This **platform** is aimed to enhance the development of a Community of Practice within WP7, in order to promote exchanges, discussion, sharing of resources and experiences.

Diachronics
Diabetes: a case study on strengthening health care for people with chronic diseases

This is a working area dedicated to Work Package 7 Diachronics: Diabetes: a case study on strengthening health care for people with chronic diseases.

The European Joint Action on Chronic Diseases and Promoting Healthy Ageing across the Life Cycle (CHRODIS-JA) aims to promote and facilitate a process of exchange and transfer of good practices between European countries and regions, addressing chronic conditions, with a specific focus on health promotion and prevention of chronic conditions, multi-morbidity and diabetes.

This Joint Action is part of the EU Health program 2008-2013 aiming to include projects that aim to contribute to increase healthy life years and to promote healthy ageing. For more information about the European Joint Action on Chronic Diseases and Promoting Healthy Ageing across the Life Cycle (CHRODIS-JA), see [EuroHealthNet website](#).

WP7 Diachronics

- Task1** Prevention of diabetes: focus on people of high risk
- Task2** Secondary prevention of type 2 diabetes
- Task3** Non-pharmacology interventions-Health promotion
- Task4** Education strategies and approaches
- Task5** National diabetes plans

WP7 Questionnaires

The tasks 1- 4 have the common aim to map national/regional strategies on four essential topics:

- identification of high-risk people, and primary prevention of type 2 diabetes
- secondary prevention, including models of care delivery
- health promotion interventions
- educational intervention for persons with diabetes, and training for health professionals

WP7 Questionnaires

A combined **questionnaire** with four sections was developed to collect the data.

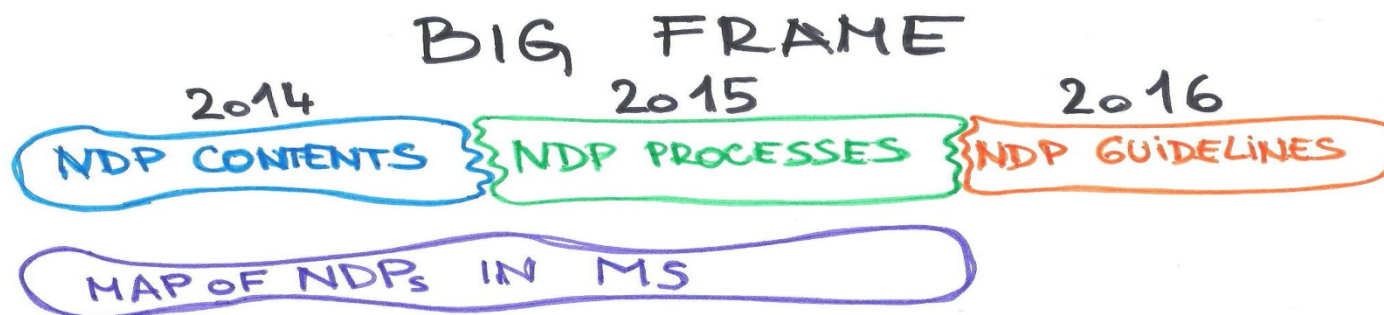

- Web-based (on CHRODIS web site)
- English language
- Target: national health agencies, individual health care providers, patient organizations, organizations of health care professionals.

To be discussed and evaluated during the **WP7 meeting** on July 9th

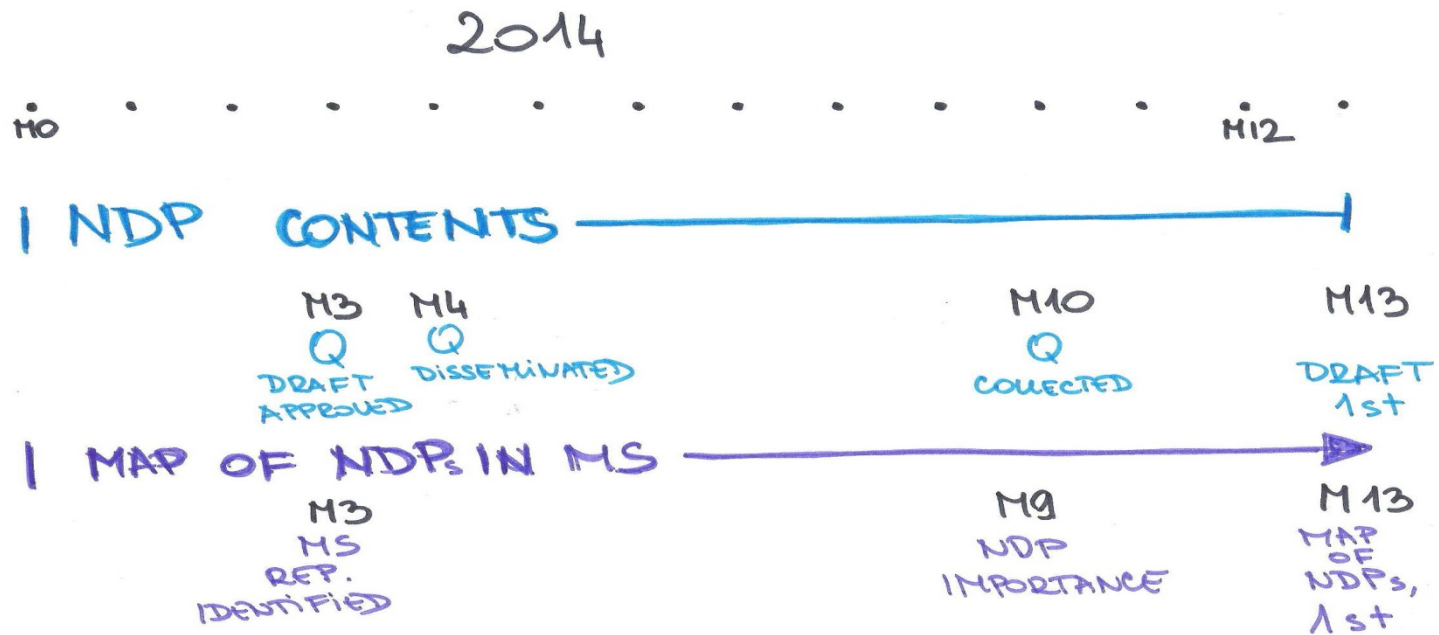

Next steps

- final version of the questionnaires
- data collection
- based on the questionnaire answers, a subgroup of respondents will be contacted for a more detailed and in-depth data collection (2015)

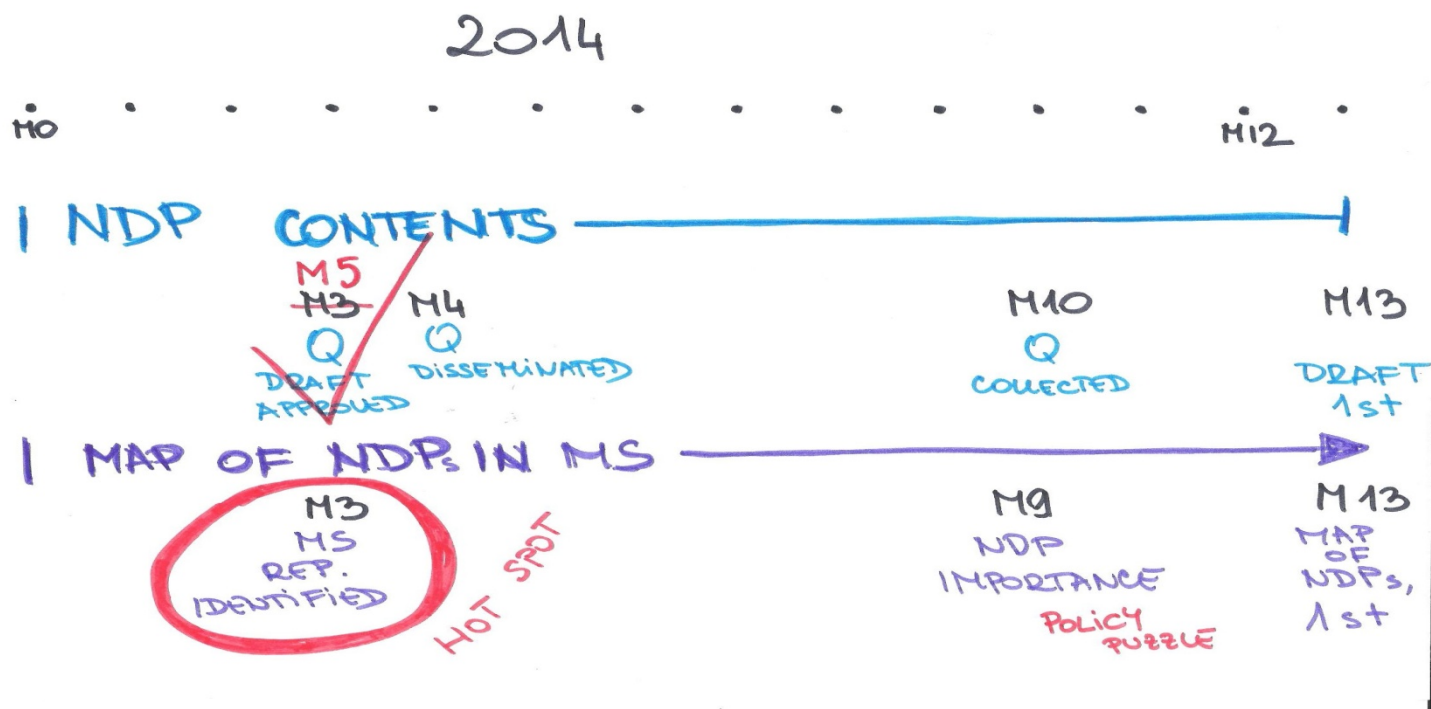

Task on National Diabetes Plans

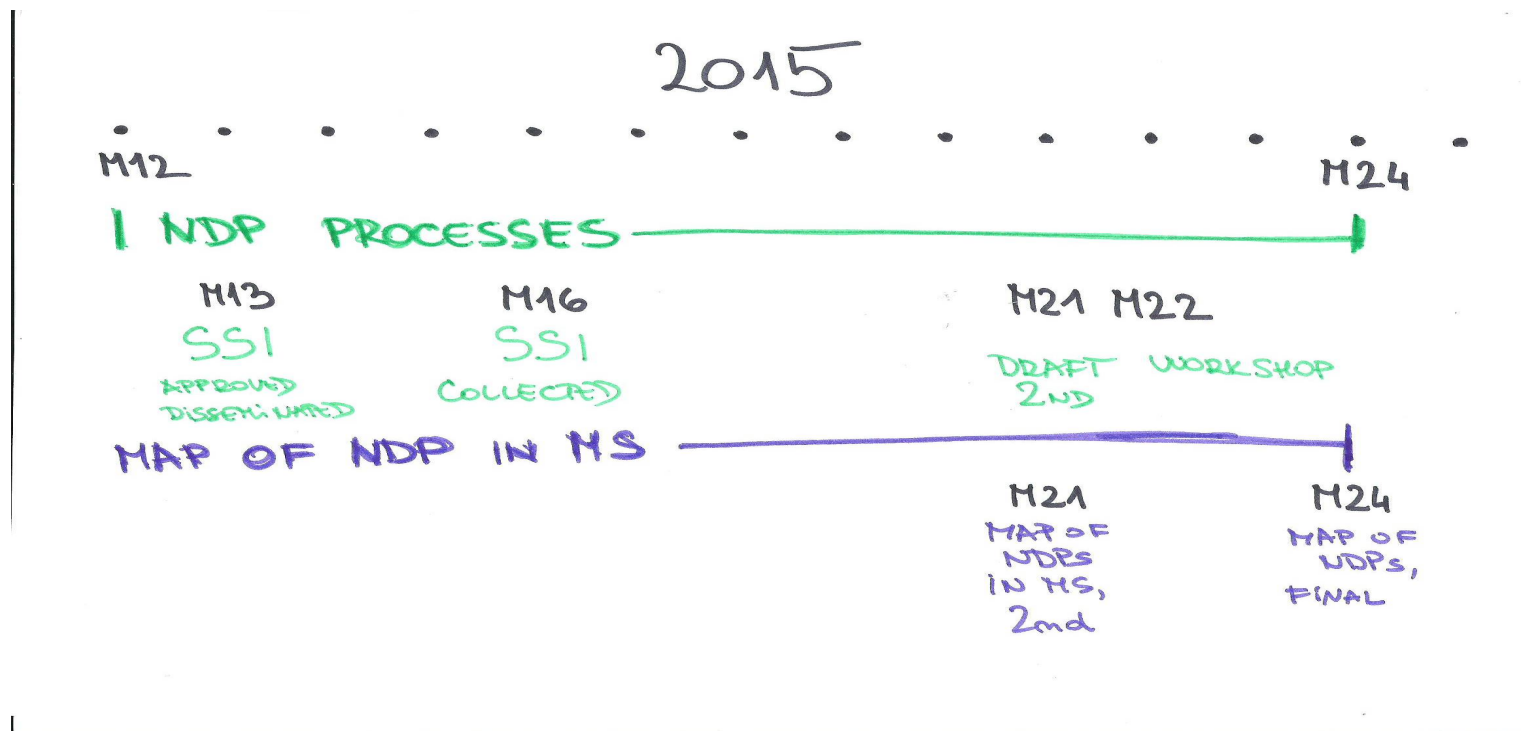

Task on National Diabetes Plans

Task on National Diabetes Plans

Task on National Diabetes Plans

Next steps

- Wait for board of MoHs constitution
- Join with APs, CPs to collect the data
- Adaptation of Questionnaire and Protocol
- Situational analysis

WP7 Questionnaires

The responses to the questionnaires will not be used to examine the performance of policies or programs in any given country, to rank countries according to their policies and programs or as a benchmarking tool.

Meeting

2nd WP7 general meeting in Autumn 2015 (date to be defined)

The Joint Action on Chronic Diseases and promoting healthy ageing across the life cycle (JA CHRODIS)*

*** THIS PRESENTATION ARISES FROM THE JOINT ACTION ON CHRONIC DISEASES AND PROMOTING HEALTHY AGEING ACROSS THE LIFE CYCLE (JA CHRODIS) WHICH HAS RECEIVED FUNDING FROM THE EUROPEAN UNION, IN THE FRAMEWORK OF THE HEALTH PROGRAMME (2008-2013)**
