# Joint Action on Chronic Diseases and Promoting Healthy Ageing Across the Life Cycle

### STAKEHOLDER MAPPING

## Stakeholder Mapping and Internal Contact Database

#### **Approach**

As stated in the JA-CHRODIS Grant Agreement, dissemination of the Joint Action refers to "actions undertaken to ensure that the results and deliverables of the joint action will be made available to the target groups" (p.10). The Grant Agreement also states that "all partners will conduct a stakeholder mapping exercise to identify a broad range of stakeholders in their country" and goes on to explain: "These contacts will be stored in an internal contact database and used for targeted dissemination and advocacy purposes" (p.56, March edition). In order to achieve this objective, EuroHealthNet developed a Stakeholder Analysis and Mapping Guidance Document (see Annex 1 of this document), which included an excel feedback form that was sent to all partners in March 2014. These documents include lists of stakeholder groups for each WP that were reviewed and validated by JA-CHRODIS WP leaders and partners. Partners were requested to fill out the excel feedback from by listing all stakeholders that they identified and their contact details (milestone, due M3).

The following instructions for filling in the stakeholder mapping were given to partners: "We ask you to think through each group and to provide the relevant names and contact details of organisations or individuals at the sub-national, national, European and international level. This exercise has to be carried out in the attached excel sheet where each WP has their own tab. Please add the necessary rows. If you have provided new categories in question 1 above, please include these too."

After having received 17 responses (covering 12 countries) to the stakeholder mapping from JA-CHRODIS partners, EuroHealthNet compiled all of them into one contact database. The three Irish organisations (EIWH, IPH and HSE) collaborated and handed in one single document. In total, the mapping exercise produced 495 individual contacts (from 432 organisations). After adding data from various other sources, the internal database contained 1350 contacts in April 2015 (see Figure 1).

Over the course of time, this database was supplemented with more contacts:

- All contact persons of JA-CHRODIS associated and collaborating partners
- Participants of the Chronic Disease Summit April 2014 (Excel file received from the CHAFEA on 19<sup>th</sup> June 2014)
- Individual requests by email to be added to the mailing list (info@chrodis.eu)

Many partners, probably due to privacy reasons, in their stakeholder mappings provided general email addresses of organisations rather than personal emails of individuals. 'Blank' refers to a contact where no clear country could be retrieved. These are often contacts that have sent an email expressing interest to <a href="mailto:info@chrodis.eu">info@chrodis.eu</a>. Most of the other contacts are from the UK, Belgium and Spain.

At the moment, this internal contact database is used to store all recipients of the JA-CHRODIS newsletter (bi-annually) and the JA-CHRODIS monthly updates. Through clustering the contacts on a

number of factors, we are able to send targeted mailings (such as only researchers or only policy-makers on EU-level) as well.

#### **Description of the results**

The following reflects an analysis of the 1350 contacts in the internal database. It covers the distribution across countries (Figures 1 and 2) and the number of contacts by type and level of organisation (Figure 3).

Country	Number of contact	Country	Number of contact
(blank)	343	Finland	12
United Kingdom	315	Denmark	12
Belgium	112	Russian Federation	9
Spain	75	Norway	9
Germany	61	Luxembourg	11
Iceland	53	Turkey	8
Portugal	41	Romania	7
Ireland	39	France	7
Other	32	Croatia	6
Netherlands	32	Slovakia	6
Italy	32	Czech Republic	6
Greece	25	Poland	5
Sweden	25	Latvia	5
Bulgaria	21	Estonia	4
Lithuania	18	Slovenia	4
Switzerland	15	Total	1350

Figure 1: Number of contacts per country. (\*Other countries include the following countries (1-3 contacts): Albania, Armenia, Austria, Azerbaijan, Belarus, Canada, Colombia, Cyprus, Faroe Islands, Georgia, Hungary, Israel, Kazakhstan, Kyrgyzstan, Macedonia, Republic of Malta, Moldova, Serbia, Ukraine, United States, Uzbekistan)

Figure 2: Distribution of percentage of country

Note that only organisations are given distinctions between type and level. Individuals linked to the organisations are not clustered. Most of the contacts in the JA-CHRODIS are from national associations, from government (local, regional and national level), research organisations (mainly universities) and European-level federations (see Figure 3).

Type of organisation / Level	Local	Regional	National	European	(blank)	Total
European Federation				98		98
European Institution				5		5
European Network				10		10
Government	47	25	62		1	135

(blank)					33	33
Total	47	37	420	118	96	720

Figure 3: Number of contacts by type and level of organisation (table does not include individuals)

#### **Conclusion**

The stakeholder mapping has led to a compilation of contact details of stakeholders that partners have identified as key players (high interest and high influence). This list will continue to grow over the course of JA-CHRODIS. Since January 2014, we have collected contacts from many different sources as well. These include the participants from relevant EC-organised events and personal subscriptions to the newsletter.
